HOW TO SOLVE FOR REPARATIONS IN AMERICA

GOAL: USE NEXT-GENERATION TECH AND AN INNOVATIVE APPROACH TO CREATING SOCIAL CHANGE PLATFORMS IN SOCIETY; USE THAT REVENUE TO PAY FOR AN AI-DRIVEN REPARATIONS INITIATIVE.

STEP 1: Build an AI-Powered Reparations Platform that will account for all major socio-economic issues affecting people of color.

WHAT'S THE APPROACH?

- Leverage best-in-class AI services
- Align with city, state legislators
- Create alignments with key non-profits, dev groups in Seattle area
- Partner with them on the tech buildout and delivery efforts.

HOW IT WILL BE BUILT:

- Introduce concepts, approach
- Show people the tech (DIDs)
- Get community input (reqmts)
- Build out a test model (POC)
- Get more community input
- Finalize and deploy the solution
- All results trackable via an app

SOLVE FOR 'RACIST DATA'

As part of this effort, we can even build algorithms that are historically-correcting, in terms of countering for the racist results in the data to this point. These algorithms can then be used in a wide rage of public and private sector policies or markets.

*Key Performance Indicators: the factors by which we will measure success of the effort.

THE KEY INPUTS

- KEY TECHNOLOGY: DIDs, OpenAI
- KEY LOCAL NON-PROFIT: ACLT
- KEY PUBSEC ALIGNMENT: The Mayor
- KEY POLICY: data privacy, DID use laws
- KEY TECH GROUPS: ADA Developer Academy, Avela (young, black devs)

WHO WILL PARTICIPATE:

- Public Sector (City of Seattle, UW)
- Members of the Community: non-profits, students, teachers, social workers, volunteers.. Anyone!!
- AI-based data scientists (offshore)
- Local black developers, esp. women
- Professional IT staff; all major fields

HOW WILL IT WORK?!

- People of African American descent create a profile
- Reparations AI algorithms calculate a yearly amount based on inputs (age, zip code, school, work history)
- Citizens join projects they are interested in, become shareholders / owners of Social Change Platforms**
- SCPs are sold, citizens earn revenue (paid to wallet)

**See below or our website for details.

WHAT'S THE MESSAGE?

CREATE AND OWN THE PROCESS!! Build a modern-day Marcus Garvey business model; own the pipeline, control the cost structure, revenue stream, etc. (It's 'the Black Star Line in the Blockchain' type of concept).

HOW IT WILL BE TRACKED:

- Open-source code = 100% transparency and accountability
- All KPIs* will show how they are calculated, grow year to year
- Total will be updated, based on each individuals' residency status
- Audited by independent 3rd party; approved and reviewed by SMEs

METRICS WE WILL USE

There was a recent report by the NUL called State of Black America (Executive Summary, 2024 Stats); we will use those metrics as the baseline to work from and apply our success metrics, or our KPIs against.

STEP 2: Build and Sell Social Change Platforms, the source for reparations; which will be designed, built and owned by the people.

We believe that the path to reparations is not to rely on politicians; they will only do what is politically expedient for them. You need to rely on yourselves; and you can do that by building and owning new socio-economic systems, or Social Change Platforms that work for you, as we sell them all over the country and the world. This is how to solve for both reparations and the disparity in various services.

① DOWNLOAD THE APP

Available on Android and iOS; all services in the app are free to join.

The app is free for everyone; cancel any time.
WWW.SOCIALCHANGEPLATFORMS.COM

② LOG IN, SET UP YOUR DID*

Take complete control of your data with data privacy law-compliant technology.

WHAT YOU GET:
- Identity Ownership
- Digital Wallet
- Data Privacy Laws
- Project Access
- Tech, Project Updates

WHAT YOU CAN DO:
- Maintain all your data
- Store Crypto Assets
- Opt-out, First right of refusal; 100% control
- Get a copy of your data

*Decentralized Identity; total control of your digital presence.

③ JOIN A PROJECT

Free to join any project; can also submit new project ideas.

- ☑ Election Reform Project (Intro)
- ☐ Financial Reform Project (Intro)   **OR**   Submit a New Project
- ☑ Policing Reform Project (Intro)
- ☐ Political Reform Project (Intro)
- ☐ Prison Reform Project (Intro)   (via web or app)

1 hr. minimum credit given for all projects you join (link).
Higher ownership options for approved projects (link).

④ PROVIDE FEEDBACK

Provide input or other tasks on all the projects you've joined.

Select a Project:

Your Projects ▼
Election Reform Project
Policing Reform Project

Actions:
- Give Feedback
- Project Schedule
- Email Project Lead
- Sales Activity
- Quit Project

⑤ BECOME AN OWNER

Shares issued to all members; 1:1 ratio of shares to hours.

Election Reform Project: 2 hours logged
Policing Reform Project: 3 hours logged

5 project hours = 5 shares of stock issued.

DID + Wallet

⑥ EARN REVENUE

When the app is sold, you are paid based on your ownership.

Sales Activity: Policing Reform Project

The Accountable Policing Platform; sold to city of Portland for $100,000/mo. on Mar. 12.

My Ownership: 3 shares = 0.00821%
My Earnings: $8.21 / mo.
